A. Cox, of Keokuk, Iowa, who, by his zeal and indefatigable industry as a collector, has brought together one of the finest collections of these beautiful fossils ever obtained from the Keokuk limestone, and he has also been so fortunate as to obtain a large number of specimens from a higher horizon in the Keokuk group, than that from which most of the crinoids peculiar to this formation had previously been obtained. In the winter of 1879, a few finely preserved crinoids were found by Mr. Cox and Mr. Anderson, of Keokuk, in loose pieces of sandy shale at the foot of the bluff about a mile below the city, which had evidently fallen down from above, and an ineffectual attempt was at once made to discover the exact horizon from which the shaly fragments had come. On a subsequent visit by Mr. and Mrs. Cox to the locality, the latter, who is also an excellent collector, succeeded in locating the exact spot from which the crinoids had come, and in finding the fossils in situ. By quarrying into the bluff at the right point, some four or five hundred specimens have been obtained by different collectors who have visited the locality, all secured from a surface scarcely more than six feet square, and from a stratum, only a few inches in thickness, situated near the dividing line between the geodiferous shales of the Keokuk group, and...
