Brand New Book ***** Print on Demand *****.Excerpt from Report of Ice and Ice Movements in the North Atlantic Ocean The subject of ice and ice movements is one to which the Hydrographic Office has given special attention, mainly through its branches at Boston and New York, where reports are regularly received and transmitted to the meteorological division of this Office; here the information is carefully tabulated, and appears on the monthly pilotchart of the North Atlantic Ocean, on which the ice for the previous month is plotted, and a course laid down to clear it. This course, though some 200 miles longer than the shortest possible route (close to Cape Eace), is the most economical one that can be followed, not only clearing the ice region, but also avoiding that greatest menace to navigation, fog. At first these precautionary measures were deemed excessive by many captains, but the number is notably decreasing annually, and their wisdom is becoming apparent in the gradual approximation to the pilot-chart routes by the trans-Atlantic steamer lines. As the season advances, the force of the Boston and New York branch offices is greatly occupied in furnishing information on this important subject to captains, for whom, on the eve of sailing, all the latest ice reports are plotted on the charts, and the managers of the steam-ship lines are supplied with copies of all ice reports received. The opening of navigation in the St. Lawrence River and Gulf is an important matter in the New York market, and the subsequent movement of the ice is a subject of great interest to those wishing to charter vessels for that trade. The Office has made every effort to collect the latest...
